Aladdin's Wishes

A. Can you figure out which part of the story is "Paradox," which one is "Hobson's Choice," and which part is "Catch-22"?

1) Alladin found a magic lamp. When he rubbed it, a genie appeared. The Genie said he could make a wish come true with a single click of his fingers. But there was a rule: he could only make wishes for others, not for himself. Alladin said, "Genie, I wish you would make a wish for yourself right now."

2) Alladin had a comfortable life now with everything he had ever wished for. But he became very selfish and started rubbing the lamp so many times a day that Genie felt tired. Genie told Alladin that he could call him as many times as he wanted, but it must be raining outside.

3) Months passed, and the kingdom had the worst drought in years. Alladin thought of asking the Genie to make it rain, but the Genie would appear only when it was raining outside.

B. Could you write examples of situations that fit into these three categories?

Paradox _____

Name _____

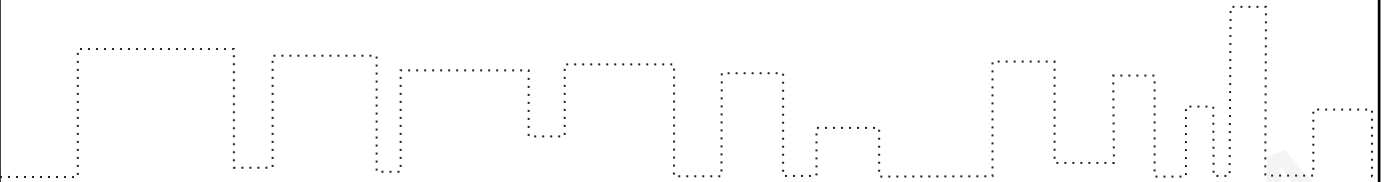

Class _____ Roll no. _____

Left, Right, Left

A. Trace the following pattern using your left hand.

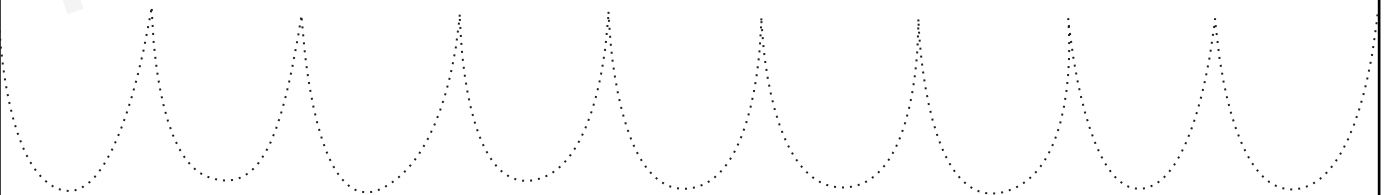

B. Trace the following pattern using your left hand.

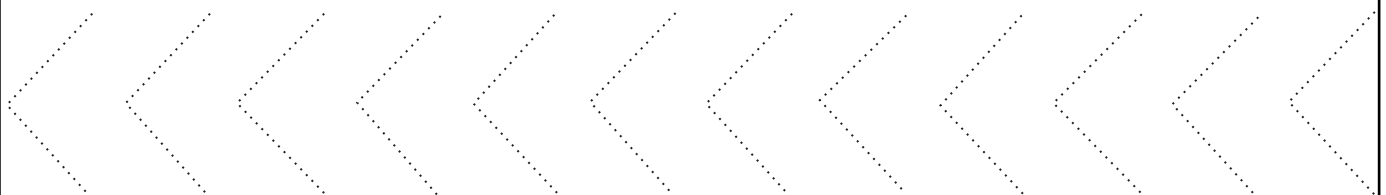

C. Trace the following pattern using your right hand.

D. Trace the following pattern using your left hand.

E. Trace the following pattern using your both hands.

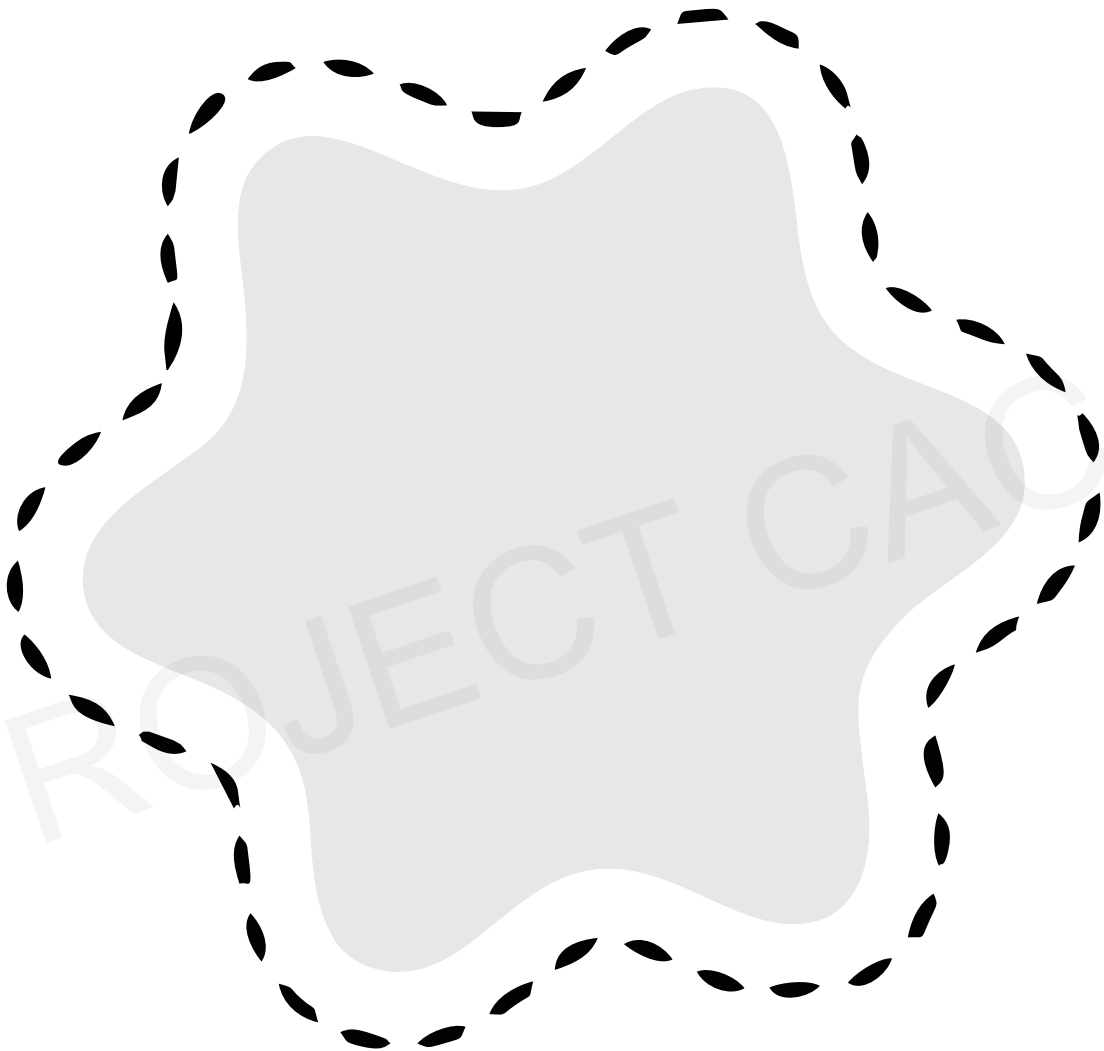

Name _____

Class _____ Roll no. _____

Left, Right, Left

F. Hold the scissors in your left hand and cut along the dotted line of the flower pattern below. (Things needed: A pair of scissors)

How was your experience? Was it easy? Was it fun? The world is designed for right-handed people. Left-handed individuals often face frustration when using scissors. This happens because most scissors are tailored for right-handed users, causing discomfort and reduced efficiency for left-handed individuals. Some common issues left-handed people encounter with right-handed scissors include blade misalignment, uncomfortable grip, hand fatigue, uneven cutting, limited scissor options, and challenges in learning.
